Please find below and/or attached an Office communication concerning this application or proceeding.

		Application No.	Applicant(s)			
	Office Action Commons	10/627,263	KUROKI, YOSHIHIDE			
	Office Action Summary	Examiner	Art Unit			
		Felix O. Figueroa	2833			
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1)🖂	Responsive to communication(s) filed on 01 June 2004.					
2a)⊠	This action is FINAL . 2b) ☐ This action is non-final.					
3)	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.					
Dispositi	on of Claims					
5)□ 6)⊠ 7)□	Claim(s) 1-11 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. Claim(s) is/are allowed. Claim(s) 1-11 is/are rejected. Claim(s) is/are objected to. Claim(s) are subject to restriction and/or election requirement.					
Applicati	on Papers					
9)□ .	The specification is objected to by the Examir	ner.				
10) 🔲	10)☐ The drawing(s) filed on is/are: a)☐ accepted or b)☐ objected to by the Examiner.					
	Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).					
11)	Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.					
Priority under 35 U.S.C. § 119						
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received. 						
Attachment(s)						
1) Notice of References Cited (PTO-892) 2) Notice of Draftsperson's Patent Drawing Review (PTO-948) 4) Interview Summary (PTO-413) Paper No(s)/Mail Date						
3) Inform	e of Draftsperson's Patent Drawing Review (PTO-948) nation Disclosure Statement(s) (PTO-1449 or PTO/SB/0 r No(s)/Mail Date		ate latent Application (PTO-152)			

Application/Control Number: 10/627,263

Art Unit: 2833

DETAILED ACTION

Claim Objections

Claims 4 and 7 are objected to because of the following informalities:

In claim 4 line 2, "the insertion parts" lacks antecedent basis.

In claim 7 line 4, "the vertical direction" lacks antecedent basis.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5, 10 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Horikoshi et al. (US 2001/0031570).

Horikoshi discloses a shuttered connector and a mating connector with an insertion part (60) having a slanted surface (60T), the shuttered connector comprising: a fitting part (at 26) that receives a mating connector (30); an insulator (26); a shutter (42A,42B) rotatably supported by the insulator between a closed position (Fig.2) at which the shutter covers the fitting part and an opened position (Fig.7) at which the mating connector is fitted with the shuttered connector; and elastic members (52) that continuously urge the shutter in the closing direction, the shutter including a guide unit

(58) with an inclined face (see Figs.5-7) that is pushed by the slanted surface, and the mating connector capable of being fitted with the shuttered connector.

Regarding claim 2, Horikoshi discloses the shutter opening in a direction orthogonal to the fitting direction of the mating connector.

Regarding claim 4, Horikoshi discloses two insertion parts (42A) on both sides of the mating connector.

Regarding claim 10, Horikoshi discloses the mating connector mounted on a substrate (24).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Horikoshi in view of Hwang (US 6,454,580).

Horikoshi discloses substantially the claimed invention except for the shells. Hwang teaches the use of shells (41) covering ends of the insulator to provide a ground connection. Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the connector of Horikoshi with shells, as taught by Hwang, to provide a ground connection.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Horikoshi.

Art Unit: 2833

Horikoshi inherently discloses contacts in the connector with mating contacts in the mating connector. Horikoshi discloses substantially the claimed invention except for the contacts being socket contacts. However, it would have been an obvious to form the contacts of the connector as socket contacts, since it would work equally well regardless of the specific contact and one skill in the art would have been able to select a specific contact type base on aesthetic/environmental requirements/preference.

Response to Arguments

Applicant's arguments filed June 1, 2004 have been fully considered but they are not persuasive.

In response to Applicant's arguments that "the shutter cannot easily be assembled to the connector and require parts more than that in the present invention", it is noted that the features upon which applicant relies are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Nonetheless, it is note that "the easy assembling" of the connector is not relevant to the structure claimed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 10/627,263 Page 5

Art Unit: 2833

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Felix O. Figueroa whose telephone number is (571) 272-2003. The examiner can normally be reached on Mon.-Fri., 10:00am-6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula A. Bradley can be reached on (571) 272-2800 Ext. 33. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
